Art Unit: 1731

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to an enzyme treated paper sludge, classified in class 435, subclass 277.
- II. Claims 9-16, drawn to a method of making paper, classified in class 162, subclass 72.
- III. Claims 17, 28 and 29, drawn to a paper product, classified in class 162, subclass 100.
- IV. Claims 18-27, drawn to a method of sizing paper, classified in class 162, subclass 158.

The inventions are distinct, each from the other because of the following reasons:

Inventions (II, IV) and (I and III) are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product does not require the sizing agent of group IV, the combining and forming of Group II.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different functions. The paper of Group III does not require first being a sludge as it can be made from dilute aqueous solutions. The sludge of Group I does not require the consistency in tons of pulp or being made into a paper as required by Group III.

Art Unit: 1731

Inventions II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation. The method of making paper (Group II) does not require the sizing agent of Group IV.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
